

Lion Alcolmeter 400P

The Lion Alcolmeter 400P with a small, rechargeable printer, is a lightweight, low cost, analytical go anywhere system for on-the-spot evidential breath analysis.

It is used extensively by Police Forces around the world for both screening and evidential testing, and is Type Approved by the Home Office, Great Britain, for UK Police use in the United Kingdom, making it ideal for the UK workplace.

The Lion Alcolmeter 400P is fully automatic. This means it is very simple to use. The Lion fuel cell sensor ensures high specificity to alcohol and a long stable working life. To ensure legal defensibility, six monthly calibrations are required which can be managed by Hampton Knight. Breath alcohol readings are shown on a large illuminated display. Four indicator lights inform and instruct the operator.

All readings are stored in the memory, with date and time and can be downloaded to a printer or pc (additional software required). The printer provides multiple, tamper-proof copies of the alcohol reading, with date and time; plus spaces for operator and donor details and location to be entered by hand. The Lion Alcolmeter 400P may be used for fast donor screening and is energy efficient with just five AA cells giving around 2,500 breath tests.

Hampton Knight can provide competency training, testing protocols and consent forms to ensure your testing process is robust and legally defensible.

Key Features

- ✓ Simple to use
- ✓ Fast accurate analysis
- ✓ Easy to read display
- ✓ Automatic data collection
- ✓ True evidential capability
- ✓ Low power consumption
